Miscellaneous. Candles are made from wax of the *jicote*, a wild bee, and from the wax of the wild wasps. Clothes are washed with *jaboncillo* (*Leguminosae* sp.). This is a vine which grows near the river Diquis. The roots only are used, and are cut into pieces and mashed. When mixed with water, suds are produced, and it is an effective cleansing agent. Brooms are made of fern leaves tied to wooden handles. Cocoa-butter is found in every Boruca household. The women rub it in their hair so their hair will shine. It also has a common use as a salve for certain remedies, such as boils or sores on the legs. To make the butter, the cacao bean is toasted and then boiled. The grease rises to the top, and then is skimmed off and put on a *bijagua* leaf (see p. 9), or in a gourd, to cool and to solidify. The liquid remaining in the pot is drunk. This is called *tivia* in Spanish and *kao* in the Boruca tongue.

MEASUREMENTS OF TIME

moon as well as by the calendar of the *ladinos*. Most of the Indians have no conception of their age. The numeral count of these people runs from one to eight, Spanish being used for the remaining numbers. Foodstuffs are measured by hand-fulls or by gourds. There does not appear to be indigenous methods for weighing.

CYCLE

8). The end of the cord is burned with *tocolote*, the colored cotton. White cotton is not used. The cut part is buried where the child is born. In cases when the cord is slow to fall off the infant, the dust from the *bajareque* of the house wall is mixed with cinnamon and applied to the babe. After birth, the child is bathed in the liquid remaining from boiling three plants. One is a grass which grows in the savanna and is called *trik-kra'*. This is a very fine grass that has a little root resembling *tiquisqui* and yellow blossoms. The other plant grows by streams and is called *tʃu-kra'*. Pittier does not mention *trik-kra'* but cites *tsbu-krá*,[33] and gives the same use for it. Standley,[34] following Pit-
